Nichole Hanscom helps business owners build systems that save their sanity and their bottom line. Radical Administration was founded with the goal helping businesses be more profitable by implementing profitable administrative and workflow systems.

Before becoming a lawyer, business advisor, and systems builder, Nichole was a legal administrator at the largest criminal defense firm in Tampa (and the 4th largest in Florida). She wrote employee handbooks and standard operating procedures; designed websites and annual reports; tested new technology; trained staff; designed and deployed time-keeping systems and case management systems; and produced the metrics that helped supervisors understand how to balance people and processes.

Nichole has extensive experience in the public and private sectors, helping to build *and run* workflow and administrative systems for law firms, non-profits, government agencies, and local small businesses. Nichole has also been instrumental in establishing for profit and not-for-profit corporations and limited liability companies locally and statewide, both as an advisor and as an attorney.

With Radical Administration, Nichole works with entrepreneurs to help them form their businesses, turn their *ideas* into *assets*, and take the necessary steps to protect those assets. Nichole is also a marketing and systems advisor for How to Manage a Small Law Firm, a company dedicated to solo and small law firm owners.

Nichole is one of the rare breed of Tampa residents, who was born and raised in Tampa. Nichole graduated from the University of South Florida and got her Juris Doctorate from Stetson University College of Law. Nichole currently lives in Tampa, with her husband, teenager, and 2 bulldogs where she celebrates a love of wine, art, and rock & roll.
